Pakistan has emerged as one of the leading textile country in the world. Having a huge textile market in Karachi. Textile industry has different sectors having a huge setup. Printing being the most commonly used and known method, also one of the oldest. Being the most oldest form it has many types of techniques and sublimation being one of them. It is commonly used and also the oldest technique. But due to the limitations of fabric it has lost its value in the past few years. The rising demand of printed shirts and t-shirts and their varieties in colours and fabrics have made textile sector more richer.
